

➤➤➤➤ Go Digital with ID Issuance & Event Tracking

Issue Secure Digital IDs & Track Users into Routine or Special Events from Their Phone

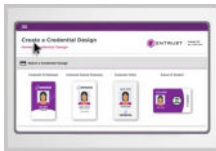

Using IDaaS & EPIC Track Cloud-based, Integrated Solutions

Identify and track people using a cloud-based solution that combines digital ID issuance with event tracking from anywhere using a mobile device. With easy implementation requiring no data uploads and little maintenance, you can share data in real time and begin tracking users immediately upon issuing a printed ID card or digital credential stored on their smart phone.
