FAQs

How are Elliott proximity cards different from the cards we currently use?

Elliott proximity cards use the same proximity card technology as other prox cards and are compatible with numerous brands of access control readers such as HID, Schlage, OmniClass, SimpleAccess, etc.

Elliott offers customers the option to test a programmed Elliott prox card with their readers before purchasing their first order to ensure compatibility and a worry-free purchase experience.

Are Elliott proximity cards the same quality as the cards I currently use?

Absolutely. Elliott partners with manufacturers who use only high-quality proximity card materials and technology to ensure the same level of quality as any other proximity card available. We carry industry standard lifetime limited warranties – the same as major brands and suppliers.

Why is Elliott more affordable than other providers?

Because Elliott's proximity cards are non-proprietary, Elliott has a strong supply chain made up of many USA and international card manufacturer resources, creating more competitive purchasing power. This allows Elliott to offer everyday low prices so customers can depend on routinely low costs.

What are Elliott's turnaround times for proximity card orders?

Elliott's order fulfillment is much faster than most suppliers due to their large network of manufacturer relationships. Elliott customers do not experience the long wait times for orders to arrive compared to proprietary providers. Customers can typically can expect most orders to take about one week to ship.

Elliott representatives can provide you with an expected order delivery date with any quote upon request to verify our fast turnaround time.

Are Elliott proximity cards secure?

Elliott proximity cards offer the same level of security and functionality as all proximity cards on the market. With that said, prox card security is greatly dependent on user practices. Prox cards can be cloned and copied just like any traditional door key. In fact, many local hardware stores offer prox card and key fob copy service.

For a truly secure access control card, smartcard contactless cards would be the better choice and offer a great deal more security for only a few cents more per card. Elliott representatives are available to discuss smartcard card stock and other security options and answer any questions you may have.
